

ENVIRONMENTAL POLICY

To ensure continued commitment to employee safety, environmental responsibility and prevention of pollution in its activities, products, and services, Top Management of Sector Supply will:

1. Provide a safe and healthful environment ensuring all personnel are properly trained with appropriate safety and emergency equipment, in accordance with applicable environmental and safety regulations;
2. Be an environmentally responsible organization that conserves natural resources, minimizes waste, maximizes efficiency to reduce energy usage, meets all Federal, State, and Local environmental regulations; and
3. Strives to continually improve our Environmental Management System and performance, to include: prompt correction of practices not in compliance with this policy, periodic review of the policy and its compliance, objectives, and targets, and continual maintenance and documentation of the system.

Richard Kirkup, President and Founder

The President of Sector Supply has formulated the Environmental Policy, and defined the scope of this policy as the business, warehousing, inspection, test and repair processes used to provide procurement and repair services at 2525 Kramer Lane, Austin TX 78758. The policy is explained and discussed with all employees and is regularly reviewed thereafter. All employees are expected to know what the environmental policy means to them as it affects their position within the Company. The policy is posted in prominent locations throughout the scope facility and the current version of this policy shall be posted at www.sectorsupply.com at all times.
